

Name: _____

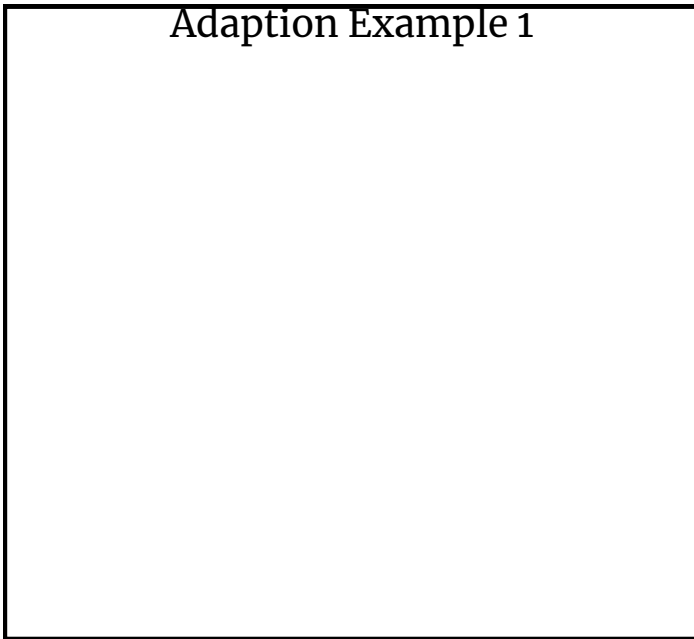

Adaptation Hunt

You learned about different adaptations to fire with your guests in the classroom. Adaptations are the ways that a plant or animal can survive in the place where it lives. For example, thick bark lets a Ponderosa pine survive a fire. Today you are going to go on an Adaptation Hunt.

Instructions:

- Walk around your school.
- Look for plants and animals.
- What helps them survive? Look for clues in their shape, structure, or behavior.
- Choose two plants or animals to draw and label their adaptations below.

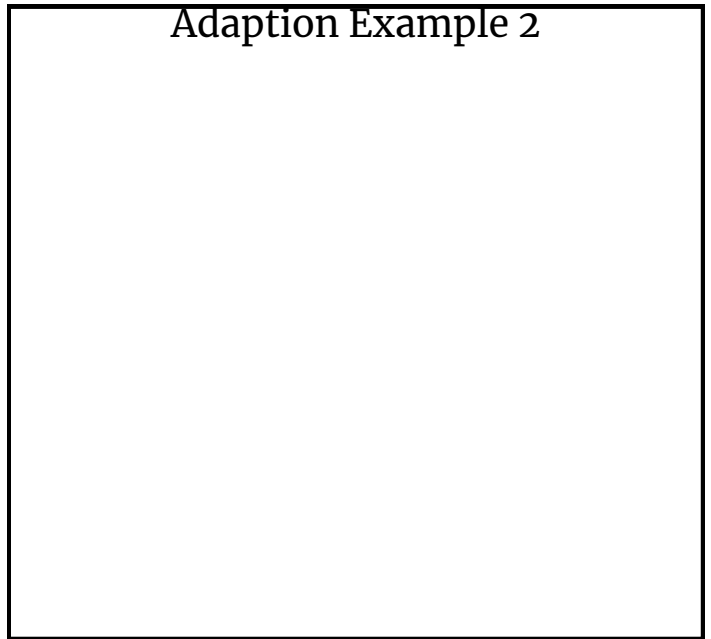

Adaption Example 1

I noticed _____

I think this helps the plant or animal survive by _____

Adaption Example 2

I noticed _____

I think this helps the plant or animal survive by _____
